

## Monthly Executive Summary – 13 October 2006

*Army DIMHRS – Integrated, multi-component, personnel and pay system.*

### Recent Accomplishments, News and Updates

- The Army moved one step closer to implementing DIMHRS after successfully meeting the Army Requirements Review (ARR) on 15 Sep due to the collaborative efforts provided by the subject-matter experts from throughout the Army's pay and personnel communities.
- The ARR is a significant milestone for the Army as it effectively locks-in the Army functional requirements for DIMHRS.
- NGIT, in conjunction with the Army's DIMHRS development team, will continue to develop DIMHRS based on the new requirements.
- The Army testing team has begun to develop testing scenarios to ensure the successful deployment of DIMHRS to the Army.
- The required High Level Design (HLD) documentation was not received from EPMD/NGIT in a timely manner and Army due dates have been adjusted accordingly. The revised targets for Army submission are now: 18 Oct for Conversion systems, 25 Oct for Persistent Inbound interfaces, and 1 Nov for Persistent Outbound interfaces.
- NGIT initiated a Mock Data Load on 2 Oct but encountered technical issues culminating in a server crash. Server was rebuilt and data load restarted on 11 Oct. Results due back to Army week of 16 Oct.
